Apple's new MacBook Air (M1, 2020) is an absolutely fantastic laptop, and thanks to brilliant new additions, in the form of Apple's own M1 chip (which replaces the Intel processors used by the company) and an improved screen. In previous years, the MacBook Air was a reduced version of the MacBook, which was an excellent thin and light laptop for everyday use, but due to its low features did not really fit into intense creative workloads, such as editing, transfer ultra-high definition video or complex 3D animated scenes. However, this latest version has the same M1 chip introduced in the new MacBook Pro 13-inch (M1, 2020), which means that for the first time the MacBook Air can compete with the more expensive laptop. So it really deserves a place around the best laptops in graphic design. It is better, and still the most inexpensive MacBook you can get right now, and it means if you're looking for a slim and lightweight 13-inch laptop for video and photo editing, then the MacBook Air (M1, 2020) is the perfect choice.
