Changing transmission fluid every two years is a good rule of thumb regardless of mileage. This will minimize condensate build-up, keeping you on the road past the 100,000 mile plus mark. Fluid Recommendations. GM recommends Dexron III for all C5 manual and automatic transmissions for proper lubrication. Here is where things get fuzzy.

Corvette was produced from 1997 to 2004. The C5 does not have a dipstick to check the transmission fluid. The fluid level must be checked by raising the car and accessing the fill plug next to the transmission pan. The car must be raised sufficient to safely access the area.

How to Check the Transmission Fluid in a 2001 Corvette ...

The C4 and C5 manual transmission Corvettes have suffered complaints from a locking steering column after the ignition is turned off. It remains in the locked position after restarting. Some reports have indicated that the steering column locked rigid during driving. The only solution has

been to replace the locking plate with one that is modified.

Why the Corvette Will Always Suck in this Authors Opinion ...
A transmission fluid leak is the only reason for fluid loss. If a leak occurs, take the vehicle to your dealer service department and have it repaired as soon as possible. Page 250 How to Check Because this operation can be difficult, you may choose to have this done at your dealership service department.
