Another favorite is grasping the concept of greatest common factor or least common multiple. Right triangle trigonometry for the middle school student is explained using boating as the source of frustration. How much to tip at a restaurant? What does a half-off sale really mean? Let us not forget the "story" or word problems that really cause concerns. Distance! Rate! Time! All these ideas plus games and many more mathematical topics are reviewed on my 45 day road trip from Delaware to Florida. Coming back, with several stops on the way home, we'll explore these "frustrations".
