From Detached Concern to Empathy: Humanizing Medical ...

Empathy is neither detached concern nor sympathy, rather it is a state of understanding another person's distinct emotional perspective, and is based on emotional reasoning. Chapter 5 looks at the important issue of patient autonomy.

From Detached Concern To Empathy: Humanising Medical ...

"From Detached Concern to Empathy is a sophisticated, rigorous, and extremely well annotated defense of emotional realism in the patient-physician relationship. Bringing philosophy (both the analytic and continental traditions), psychoanalytic theory, and cultural criticism to the subject of emotion, Halpern's analysis is both encompassing and exact. Her demonstration of the impact of social ...

From Detached Concern to Empathy - Paperback - Jodi ...

The opposite of clinical empathy is clinical detachment. Detached concern, or clinical detachment, is the ability to distance oneself from the patient in order to serve the patient from an objective standpoint. For physicians to maximize their role as providers, a balance must be developed between clinical detachment and clinical empathy.

From Detached Concern to Empathy: Humanizing Medical ...

Early works in medical sociology have been pivotal in the development of scholarly knowledge about emotions, emotional socialization, and empathy within medical training, medical education, and medical contexts. Yet despite major shifts in both medical education and in medicine writ-large, medical sociologists' focus on emotions has largely disappeared. In this paper, we argue that due to ...
