This module examines gender and crime in a globalised world. Several core themes inform the international exploration of crime, victimisation and justice, including 'race', class, age, sexuality, locality, economics, politics, power and discourse. The module offers students the opportunity to engage with a broad range of internationally classical and influential bodies of literature spanning feminist and critical criminology, masculinities theories, victimology, queer theory and globalisation.

For anyone pinning their hopes on the rapid delivery of a vaccine to end the pandemic, David Heymann has a sobering message: "We need to learn to live with the virus. We need to act now with the ...

Global Lockdown is the first book to apply a transnational feminist framework to the study of criminalization and imprisonment. The distinguished contributors to this collection offer a variety of perspectives, from former prisoners to advocates to scholars from around the world. The book is a must-read for anyone concerned by mass incarceration and the growth of the prison-industrial complex within and beyond U.S. borders, as well as those interested in globalization and resistance.

Can scholars generate knowledge and pedagogies that bolster local and global forms of resistance to U.S. imperialism, racial/gender oppression, and the economic violence of capitalist globalization? This book explores what happens when scholars create active engagements between the academy and communities of resistance. In so doing, it suggests a new direction for antiracist and feminist scholarship, rejecting models of academic radicalism that remain unaccountable to grassroots social movements. The authors explore the community and the academy as interlinked sites of struggle. This book provides models and the opportunity for critical reflection for students and faculty as they struggle to align their commitments to social justice with their roles in the academy. At the same time, they explore the tensions and challenges of engaging in such contested work.

Mary Bosworth and Jeanne Flavin bring together twelve original essays by prominent scholars to examine not only the discrimination that is evident, but also the structural and cultural forces that have influenced and continue to perpetuate the current situation. Contributors point to four major factors that have impacted public sentiment and criminal justice policy : colonialism, slavery, immigration, and globalization. In doing so they reveal how practices of punishment not only need particular ideas about race to exist, but they also legitimate them. The essays unearth troubling evidence that testifies to America's brutally racist past, and to White America's continued fear of and suspicion about racial and ethnic minorities. The legacy of slavery on punishment is considered, but also subjects that have received far less attention such as how colonizers' notions of cultural superiority shaped penal practices, the criminalization of reproductive rights, the link between citizenship and punishment, and the global export of crime control strategies.

This Handbook brings together leading interdisciplinary scholarship on the gendered nature of the international political economy. Spanning a wide range of theoretical traditions and empirical foci, it explores the multifaceted ways in which gender relations constitute and are shaped by global politico-economic processes. It further interrogates the gendered ideologies and discourses that underpin everyday practices from the local to the global. The chapters in this collection identify, analyse, critique and challenge gender-based inequalities, whilst also highlighting the intersectional nature of gendered oppressions in the contemporary world order.

A critical perspective on the treatment of incarcerated women—and their children Inside and Out: Women, Prison, and Therapy challenges conventional thinking about the therapeutic issues facing female prisoners and their children. Therapists, counselors, scholars, and activists examine the injustices of the criminal justice system and the roles feminist therapists can play in deconstructing and demystifying the lives of women prisoners by becoming more involved in clinical work. Inside and Out: Women, Prison, and Therapy examines this growing problem from a feminist perspective, debunking stereotypes about women perpetrators with a thorough examination of gender-responsive treatment of women in a variety of settings. This unique book includes a macro analysis of gender and criminality; an assessment of violence and the abuse of women; parenting and the impact of incarceration on children; treatment approaches developed specifically for women prisoners; and an outline of what women need when leaving prison life. The book also examines crucial issues facing women prisoners, including sexual abuse and assault, substance abuse, mental and physical health concerns, human rights, violence, discrimination, and the unique problems of women prisoners of color. Topics addressed in Inside and Out: Women, Prison, and Therapy include: designing and delivering gender-responsive programs for women developing therapeutic measures to correct and normalize marginalized women mistreatment of women prisoners in the United States domestic violence and its connection to criminalization counseling sexually abused women motherhood, crime, and prison the effects of incarceration on children and families women, addiction, and incarceration using drama therapy with incarcerated women feminist support groups transitioning after release from prison and much more Inside and Out: Women, Prison, and Therapy is a vital professional resource for therapists and counselors who work with female prisoners and their families.

Global Gender Issues in the New Millennium argues that the power of gender works to help keep gender, race, class, sexual, and national divisions in place despite increasing attention to gender issues in the study and practice of world politics. Accessible and student-friendly for both undergraduate and graduate courses, authors Anne Sisson Runyan and V. Spike Peterson analyze gendered divisions of power and resources that contribute to the worldwide crises of representation, violence, and sustainability. They emphasize how hard-won attention to gender equality in world affairs can be co-opted when gender is used to justify or mystify unjust forms of global governance, international security, and global political economy.In the new and updated fourth edition, Runyan and Peterson examine the challenges of forging transnational solidarities to de-gender world politics, scholarship, and practice through renewed politics for greater representation and redistribution. Yet they see promise in coalitional struggles to re-radicalize feminist world political demands to change the downward conditions of women, men, children, and the planet. Updated to include framing questions at the opening of each chapter, discussion questions and exercises at the end of each chapter, and updated data on gender statistics and policymaking. Chapters One and Two have also been revised to provide more support to readers with less of a background in gender politics. Case studies and web resources are now also provided.

This book provides case studies from countries around the world regarding the nature and scope of concerns related to race, ethnicity, crime and justice. The text centres primarily on English-speaking countries where they have encountered problems related to race, ethnicity, crime and justice. The book is designed to be used as either a main or supplementary text for courses focusing on race and crime, minorities and crime, and diversity in criminal justice. Additionally, it can also be used in sociology and ethnic studies courses that focus on race and crime.

Accessible and student-friendly, *Global Gender Politics* analyzes the gendered divisions of power, labor, and resources that contribute to the global crises of representation, violence, and sustainability. The author emphasizes how hard-won attention to gender and other related inequalities in world affairs is simultaneously being jeopardized by new and old authoritarianisms and depoliticized through reducing gender to a binary and a problem-solving tool in global governance. The author examines gendered insecurities produced by the pursuit of international security and gendered injustices in the global political economy and sees promise in transnational struggles for global justice. In this new re-titled edition of a foundational contribution to the field of feminist International Relations, Anne Sisson Runyan continues to examine the challenges of placing inequalities and resisting injustices at the center of global politics scholarship and practice through intersectional and transnational feminist lenses. This more streamlined approach includes more illustrations and discussions have been updated to reflect current issues. To provide more support to instructors and readers, *Global Gender Politics* is accompanied by an e-resource, which includes web resources, suggested topics for discussion, and suggested research activities also found in the book.

This authoritative work examines key issues and debates on sex and labor trafficking, drawing on theoretical, empirical, and comparative material to inform the discussion of major trends and future directions. The text brings together key criminological and sociological literature on migration studies, gender, globalization, human rights, security, victimology, policing, and control to provide the most complete overview available on the subject.

Throughout the world, from the United States to Tanzania, Chechnya, and Sri Lanka, people increasingly work together and take actions to improve their lives, end inequality, and change global society. Action groups and movements see dialogue and learning as important ways to extend democracy and, with their inclusiveness, remake society. By putting strategy with theory, local groups and movements are able to begin making changes in civil society and institutions that allow people to begin living in new ways. Written for activists, people, and students interested in change, this book takes readers on a journey of discovery as it shows how various groups have brought theory and action together to make urban, rural, and transnational change. The case studies and explanatory articles reveal how feminist, antiracist, ecological, and peace movements reinforce each other to initiate and achieve well-placed and enduring change.
