The cool thing about algebra is you can always get your answer and put it back into the original equation to make sure you are right. So the original equation was minus 3/4 times x, and here we'll substitute the x back into the equation. Wherever we saw x, we'll now put our answer. So it's minus 40/39, and our original equation said that equals 10/13. Well, and once again, when I just write ...

So basically my teacher just told us we have to do 90 khan academy practices in a day, all Geometry. Math was never my strong point, and I can't get in done in time (its for a test grade) so I need a way to cheat on it. The practices work by you have hints that eventually get you the answer, but if you go offline then it doesn't show you the hints so I can't do that.
