O-rings and back-up rings maintain sealing contact force by radial or axial deformation in the seal housing between two machine components. The most important criteria that influence the maximum operating pressure at which O-rings in static radial sealing can be used.

~~O rings and back up rings | SKF | SKF~~

Backup rings are ultimately used to help stop o ring migration, and they achieve this in

# Read PDF O Rings And Back Up Rings Trelleborg

both static and dynamic fluid power applications as the pressure cycles occur, preventing the extrusion of an o ring in the gap. Ultimately a backup ring is a rigid ring that holds a seal or plastic connection in the correct place.

~~The Importance of Backup Rings to O Rings~~

They prevent extrusion of the O-ring when it is subjected to high pressure or when the extrusion gaps are excessive. Back-up rings are not seals themselves, but are usually used in conjunction with O-rings in high-pressure applications (over 1500 psi) for

housing groove under certain operating conditions.

~~Back Up Rings for O Rings | Specialist Sealing Products~~

They have been used for many years in conjunction with O-Rings in high pressure applications. A back-up ring is a rigid ring that holds an elastomeric seal to its designed shape and in its correct place. Back-up rings are often used with O-Rings to prevent extrusion at high pressures. When sealing the piston inside a pneumatic cylinder, a soft and flexible material is
