observation of the present and the past looked at from the viewpoint of economic measurement. Some parts of the book are especially devoted to the French experience in this field, but the point of view is deliberately universal. The publication is about; The birth of national accounting; The evolution of systems of

their many objectives. The success of reforms depends on financial innovation to mitigate key risks and some innovations are discussed, which also demonstrates how pension reform choices affect the achievement of retirement objectives. Finally, the authors examine some proposed hybrid options to show how the
