Reteaching 10 2

$441 + 400 = c^2$ Simplify.

$841 = c^2$. $c = 29$ Take the square root. The length of the hypotenuse is

29. The lengths of the

sides, 20, 21, and 29,

form a Pythagorean triple

because they are whole

numbers that satisfy

$a^2 + b^2 = c^2$. A right

triangle has a hypotenuse

of length 25 and a leg of

length 10. Find the length

of the other leg.
