Formulas — you just can ' t get away from them when you ' re studying statistics. Here are ten statistical formulas you ' ll use frequently and the steps for calculating them. Proportion Some variables are categorical and identify which category or group an individual belongs to. For example, " relationship status " is a categorical variable, and an individual could be [...]

Top 10 Statistical Formulas - dummies

The alternative hypothesis is the one you would believe if the null hypothesis is concluded to be untrue. The evidence in the trial is your data and the statistics that go along with it. All hypothesis tests ultimately use a p-value to weigh the strength of the evidence (what the data are telling you about the population). The p-value is a number between 0 and 1 and interpreted in the following way:
