HOUSTON, July 14, 2021--(BUSINESS WIRE)--STEMscopes Math from Accelerate Learning has received the highest rating from Learning List for alignment to the Common Core State Standards (CCSS ...

Spectrum Writing creates student interest and sparks writing creativity! The lessons, perfect for students in grade 7, strengthen writing skills by focusing on topic, parts of writing, dialogue, emotional appeals, and more! Each book provides an overview

Contains instructions for more than fifty experiments that children can perform using common items found in the kitchen.--

Grounded in National Science Foundation (NSF) funded-research, Supporting Grade 5-8 Students in Constructing Explanations in Science and DVD provides middle grades science teachers with an instructional framework that breaks down the practice of scientific explanation into manageable components---claim, evidence, reasoning---and offers concrete examples of what this scientific inquiry practice looks like when it is successfully implemented in real classrooms. The chapters guide teachers step-by-step through presenting the framework for students; creating learning tasks involving scientific explanation; providing curricular scaffolds (that fade over time) to support students developing explanations; developing scientific explanation assessment tasks; and using the information from assessment tasks to inform instruction. By incorporating this framework into curriculum materials, instructional strategies, and assessments, many schools have already witnessed its power to enhance students' conceptual understanding and ability to think and communicate scientifically while also affording teachers powerful opportunities to view student thinking and better adapt instruction to all students' needs. "I would encourage others to use [this book] as a resource for a professional learning community or department discussion group and the like... absolutely I would recommend it!---why? It is simply good for our students' developing understanding of science..."--Pamela M. Pelletier, Senior Program Director, Science K-12, Boston Public Schools, Boston, Massachusetts "[This book] can easily be used to guide middle school teams to collaboratively work together to ask higher order thinking questions in any core content area. This type of questioning leads to great classroom discourse, therefore engaging students in using claims, evidence, and reasoning."---Kendra Walters Durham, Science Teacher, Wester Middle School, Frisco, Texas

Interactive Notebooks: Science for grade 1 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about living and nonliving things, habitats, states of matter, light, soil, weather, and more! --This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. --Spanning grades Kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.

Addressed to K-12 teachers, discusses enhancing student achievement through project-based learning with multimedia and offers principles and guidelines to insure that multimedia projects address curriculum standards.

A hands-on and fun-filled resource for teaching science to middle and high school students New in the 5-Minute Fundamentals Series, The Science Teacher's Activity-A-Day, Grades 6-12, includes 180 easy, five-minute hook or sponge activities to capture learners' attention and introduce lessons. Divided into three units, Physical Science, Life Science, and Earth and Space Science; the activities cover topics based on the National Science Education standards. All the book's activities can be done with materials that are inexpensive and easy to find Includes quick and fun "sponge" activities that are designed to engage students All the activities take about 5 minutes to complete The Science Teacher's Activity-a-Day is an ideal resource for middle and high school science teachers.

Discusses the importance of strong interpersonal skills to a successful leader and shares strategies for leading students, faculty, and parents in a productive and accountable school.
