Written by gifted storyteller Winston Groom (author of Forrest Gump), The Aviators tells the saga of three extraordinary aviators--Charles Lindbergh, Eddie Rickenbacker, and Jimmy Doolittle--and how they redefine heroism through their genius, daring, and uncommon courage. This is the fascinating story of three extraordinary heroes who defined aviation during the great age of flight. These cleverly interwoven tales of their heart-stopping adventures take us from the feats of World War I through the heroism of World War II and beyond, including daring military raids and survival-at-sea, and will appeal to fans of Unbroken, The Greatest Generation, andFlyboys. With the world in peril in World War II, each man set aside great success and comfort to return to the skies for his most daring mission yet. Doolittle, a brilliant aviation innovator, would lead the daring Tokyo Raid to retaliate for Pearl Harbor; Lindbergh, hero of the first solo flight across the Atlantic, would fly combat missions in the South Pacific; and Rickenbacker, World War I flying ace, would bravely hold his crew together while facing near-starvation and circling sharks after his plane went down in a remote part of the Pacific. Groom's rich narrative tells their intertwined stories--from broken homes to Medals of Honor (all three would receive it); barnstorming to the greatest raid of World War II; front-page triumph to anguished tragedy; and near-death to ultimate survival--as all took to the sky, time and again, to become exemplars of the spirit of the "greatest generation."

After Pearl Harbor, he led America's flight to victory General Doolittle is a giant of the twentieth century. He did it all. As a stunt pilot, he thrilled the world with his aerial acrobatics. As a scientist, he pioneered the development of modern aviation technology. During World War II, he served his country as a fearless and innovative air warrior, organizing and leading the devastating raid against Japan immortalized in the film Thirty Seconds Over Tokyo. Now, for the first time, here is his life story - modest, revealing, and candid as only Doolittle himself can tell it.

The astonishing untold story of the WWII airmen who risked it all in the deadly race to become the greatest American fighter pilot. In 1942, America's deadliest fighter pilot, or "ace of aces" -- the legendary Eddie Rickenbacker -- offered a bottle of bourbon to the first U.S. fighter pilot to break his record of twenty-six enemy planes shot down. Seizing on the challenge to motivate his men, General George Kenney promoted what they would come to call the "race of aces" as a way of boosting the spirits of his war-weary command. What developed was a wild three-year sprint for fame and glory, and the chance to be called America's greatest fighter pilot. The story has never been told until now. Based on new research and full of revelations, John Bruning's brilliant, original book tells the story of how five American pilots contended for personal glory in the Pacific while leading Kenney's resurgent air force against the most formidable enemy America ever faced. The pilots -- Richard Bong, Tommy McGuire, Neel Kearby, Charles MacDonal and Gerald Johnson -- riveted the nation as they contended for Rickenbacker's crown. As their scores mounted, they transformed themselves from farm boys and aspiring dentists into artists of the modern dogfight. But as the race reached its climax, some of the pilots began to see how the spotlight warped their sense of duty. They emerged as leaders, beloved by their men as they chose selfless devotion over national accolades. Teeming with action all across the vast Pacific theater, Race of Aces is a fascinating exploration of the boundary between honorable duty, personal glory, and the complex landscape of the human heart. "Brings you into the cockpit of the lethal, fast-paced world of fighter pilots. . . . Fascinating." -- Sara Vladic"Extraordinary . . . a must-read." -- US Navy Captain Dan Pedersen"A heart-pounding narrative of the courage, sacrifice, and tragedy of America's elite fighter pilots." -- James M. Scott"Vivid and gripping . . . Confirms Bruning's status as the premier war historian of the air." -- Saul David

Famous for leading the Tokyo Raid, America's first strike against Japan in World War II, Jimmy Doolittle led a remarkable life as an American pilot. This firsthand account by his granddaughter reveals an extraordinary individual--a scientist with a doctorate in aeronautical engineering from MIT, an aviation pioneer who was the first to fly across the United States in less than 24 hours and the first to fly "blind" (using only his plane's instruments), a barnstormer well known for acrobatics, a popular racing pilot who won every major air race at least once, recipient of both the Congressional Medal of Honor and Presidential Medal of Freedom, a four-star general, and commander of both the 8th, 12th and 15th Air Forces. This memoir provides insights into the public and private world of Jimmy Doolittle and his family and sheds light on the drives and motivation of one of America's most influential and ambitious aviators.

The widely anticipated memoir of legendary ace American fighter pilot, Robin Olds Robin Olds was a larger-than-life hero with a towering personality. A graduate of West Point and an inductee in the National College Football Hall of Fame for his All-American performance for Army, Olds was one of the toughest college football players at the time. In WWII, Olds quickly became a top fighter pilot and squadron commander by the age of 22--and an ace with 12 aerial victories. But it was in Vietnam where the man became a legend. He arrived in 1966 to find a dejected group of pilots and motivated them by placing himself on the flight schedule under officers junior to himself, then challenging them to train him properly because he would soon be leading them. Proving he wasn't a WWII retiread, he led the wing with aggressiveness, scoring another four confirmed kills, becoming a rare triple ace. Olds (who retired a brigadier general and died in 2007) was a unique individual whose personal story is one of the most eagerly anticipated military books of the year.

In March 1910, Lt. Benjamin Foulois was ordered to Fort Sam Houston near San Antonio, Texas, with a used Wright Brothers aeroplane and a small contingent of enlisted men. His mission was to teach himself how to operate this primitive flying machine and begin demonstrating the practical uses it might have for the United States Army. This history is chronicled through in-depth captions and over 200 images as author Mel Brown tells the story of how San Antonio eventually became the cradle of military aviation. Mastery of the air would take time, equipment, and lives as the demanding flight path led from the early trials at Ft. Sam to the eventual establishment of four flying centers around the city. Working through trial and error, the aeronautic pioneers and first combat aviators convinced the military that the building of an American air arm was needed; thus the legend of the U.S. Air Force at San Antonio was born. Using many photographs never before published, the author tells the rich history of the air force bases in San Antonio, including Kelly, Brooks, and Randolph Fields. Also included are images of some of aviation's first heroes, such as Eddie Rickenbacker, Jimmy Doolittle, Charles Lindbergh, and Clair Chennault.

Celebrated historian Winston Groom tells the uniquely American tales of George Patton, Douglas MacArthur, and George Marshall, from World War I to World War II.
