En este libro se describe la base conceptual de un nuevo paradigma ecológico en arquitectura, y un proceso de diseño capaz de lograr una arquitectura perfectamente integrada en el ecosistema. En la primera parte del libro se establece con detalle una metodología proyectual, en base a 39 indicadores ecológicos, que permite el diseño de cualquier tipo de edificio con el máximo nivel ecológico posible, y al mismo tiempo se puede utilizar como sistema de evaluación y calificación del nivel ecológico de edificios ya proyectados, o construidos. En la segunda parte del libro se analizan con profundidad un amplio número de innovadores proyectos realizados por el Doctor Arquitecto Luis De Garrido, máximo exponente global en arquitectura ecológica y bioclimática, utilizando la metodología descrita, y que suponen diferentes manifestaciones de un mismo paradigma. El libro tiene un fuerte carácter académico, y al mismo tiempo tiene un fuerte carácter práctico y constituye un manual de referencia y una eficaz herramienta profesional. Sin duda, MANUAL DE ARQUITECTURA ECOLOGICA AVANZADA es un libro que inspirará a las generaciones futuras para entender la complejidad del proceso de diseño para lograr una verdadera arquitectura ecológica, plenamente integrada en el ecosistema del planeta Tierra.
